EDUCATION

2019 – Master of Science in Production Engineering, with emphasis on Lean IT at UniSociesc.

2012 – MBA in Teaching in Higher Education at Uniasselvi.

2008 – MBA (pending diploma) in Project Management at INPG.

2007 – Bachelor in Information Systems at Univille.

QUALIFICATION

I started my career in IT infrastructure and customer support, since then adding value in almos 30 years of IT Mgmt/Gov , consulting and teaching, across worldwide companies experience.
 Full time as father (my dear padawans Daniel and Benício), in my spare time an avid reader and movie buff, also a Jedi Master. I've been practicing Muay Thai for about 15 years (despite pandemics forced me to stop training).
 In the last years I've been increasing hard skills both in software development and technologies (Flutter, Python, JS, Docker, Arch Linux and other distros), as well as in agile methodologies and lean IT (Master Jedi in Lean IT and 2 certifications, Kanban and Scrum)
 On the other hand, the main soft skills are ethics, organization, QC-Story, teamwork, communication, negotiation and flexibility.
 Currently I have been focusing on software development and leaving teaching aside, so now the focus is tech and code.

WORK EXPERIENCE

Uniasselvi Group

 Since February 2013

  As a professor in postgraduate, disciplines focused on technological and educational area, both person and distance learning, as well as orientation of course completion work.
I taught classes in Bachelor of IT Management, System Analysis and Development, and Informatics, related to management and software development, IT governance and correlative, in classroom and distance learning.

GOAL

Opportunity to add value to your company using my whole skill set.
